introduction

Step 1: Pick your arm

Choose from a selection of three innovative arm styles that each compliment various applications and use-cases.

flexible steel
simple, light to medium
weight applications

modular plastic
flexible, light weight
applications, very
customizable

modular metal
versatile, light to medium
weight applications,
customizable

Step 2: Accessorize

With a catalog full of accessories and attachments, you can create a specialized mount to fit your specific needs.

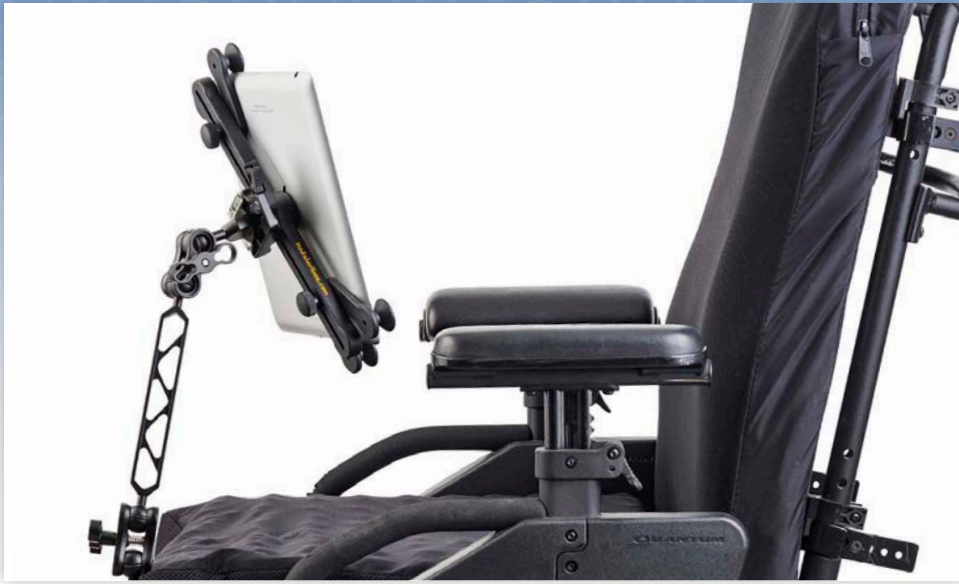

Step 3: Enjoy!

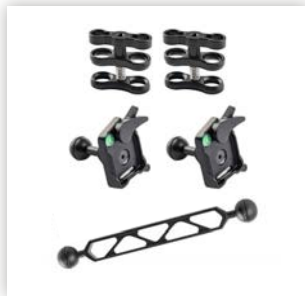

With the ingenuity of **QuickClick**, you can enjoy the convenience of clicking-in and clicking-out in no time at all!

modular metal arm

The **modular metal arm** is great for creating custom solutions. The double ball arms allow for great flexibility to create a variety of different set-ups. Easily add length with extra clamps and arms or remove sections for something shorter. The system allows for sharp angles to work around objects or for optimal positioning. Each section is made from aluminum, keeping the arm light weight. Adjustments can be made quickly by loosening clamp to reposition.

flexible steel arm

The **flexible steel arm** - commonly known as a "gooseneck arm" - is a universal arm that are widely used in a variety of fields. Straightforward and simple to use, the flexible arm is a quick and simple mounting solutions that fits many needs.

The MOGO flexible steel arm is available in different lengths with the integrated QuickClick system. The flexible arm makes a great all-around mounting solution. While each arm type will offer exceptional support, the flexible arm is available in different strengths. The medium version is great to use over a wide range while the pro is more rigid and has a higher strength rating. Arms are coated in an easy to clean vinyl cover.

MEDIUM

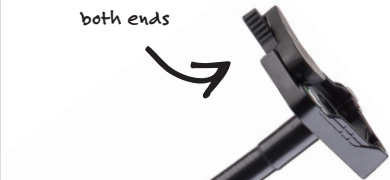

Medium arms, on average, can hold .5 to 2.5 lbs, depending on the length and configuration.

and tablet holder

modular plastic arm

The MOGO **modular plastic arm** is the ultimate in mounting flexibility and adjustability. It's bendable, poseable, and modular. Designed for light weight applications, the modular plastic arm is made up of a series of plastic beads and each can bend independently and even be popped apart, creating a customized support arm. It is great for holding small objects and light weight devices such as communication switches, small cameras, phones, and more. Tablets can be supported with the 8" modular plastic arm or longer arms if kept vertical. Two arm version is also available. Compatible with the ModularHose.com system.

QUICKCLICK

The **QuickClick™** system allows users to switch between arms and accessories quickly and easily. The QuickClick accessories thoughtfully 'click' into the corresponding plate, locking them in place. To release, both levers need to be squeezed together to disengage the QuickClick connection. This simple unlock feature prevents any accidental release and is easy for a user to engage.

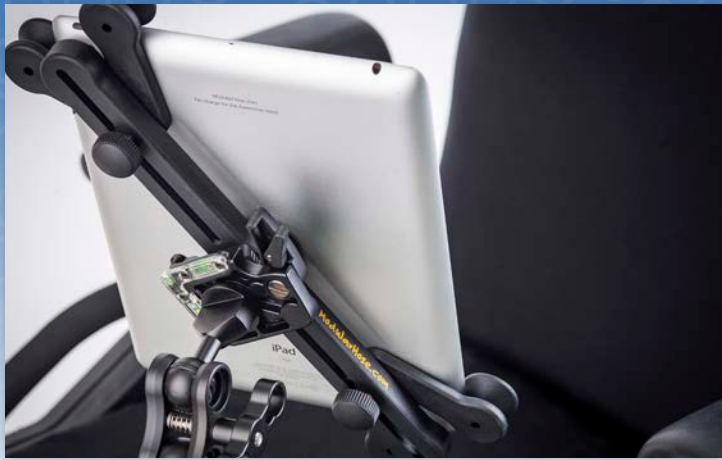

QUICKLY CHANGE ENDS

The QuickClick system allows for quick changing of ends to adjust to any situation. Select an accessory and it clicks and locks into place. Switch accessories to fit your application.

Accessories

Tablet holder

Adjustable tablet holder scales to hold virtually all tablets on their corners.

201541

Optional: Add the deep v-tabs to hold tablets that are in a case up to .75".

570009
